

To ALL Americans,

This site was founded and developed by a regular guy who is tired of seeing his country being torn apart by our (so-called) leaders. Leaders that are not accessible to voting Americans, leaders that do not tell us the truth, leaders that cannot answer a question in a straight-forward manner. Leaders that from the moment we elected them on false promises and pretenses, are immediately back to running the next campaign and raising money to keep themselves in power.

Those are the operative words, MONEY, and POWER, they have it and the American voting citizens do not. POWER is obtained with that MONEY. Money is given to them to buy their votes for organizations and special interest groups they do not represent. All that MONEY keeps them in POWER so long as they continue doing what those BIG DONORS tell them to. And it is ALL at our expense.

How can it be at our expense? How can money be the problem? How can the power be the problem? The reasons, answers and solutions are here on this site if you continue to read and educate yourself.

Most Americans do not know how the United States Government is made up. Most Americans do not know who their congressional representatives are or the responsibilities of our governmental branches. Many Americans make civil decisions based on something they hear or read and then it is accepted as fact, just because it was learned from *their* favorite source of news.

Sad, but true. How do we know for sure? That's the point, and we will never know for sure under the current structure of our government and our news outlets. In recent years if we don't like what we hear, if we don't agree with what someone has to say, all anyone needs to do is make an accusation; That's an alternate fact; That is just a lie; or the most frequently used accusation today, That is; or you are, racists. It is from these words we become even more divided.

If you are an American citizen and a registered voter, or you are thinking of registering to vote and you agree with any or all of what you have read and heard, then I invite you to join this movement and take back that POWER from those 535 elected men and women who are bought and paid for by those Special Interest Groups and Corporations. Those groups are the MONEY and they wield the POWER, for now.

The *real* POWER belongs to the PEOPLE, and we need to join together, be heard, and take back that POWER. **Earning My Vote**, this is what every person seeking to Serve the People needs to do to get elected.
